Email: Harshdeepsinghsabharwal@gmail.com

Github: github.com/harshdeep

Mobile: [+91 9555807716](tel:+919555807716)

SKILLS

Languages:	Python, C++, C
Tools:	MS SQL Server
Development:	Prototyping, API Integration, Automation, Git
Soft Skills:	Curiosity-Driven Learning, Problem Solving, Cross-Team Collaboration, Adaptability.

PROJECTS

Urban Heat Island Prediction System Github Python, ML	Ongoing
- Created an end-to-end ML solution to estimate urban heat intensity using structured geographic and environmental inputs. - Engineered preprocessing workflows, trained iterative models, and analysed prediction errors using cross-validation. - Trained and validated models on 10K+ data points, enabling repeatable performance benchmarking and visualization.	
CIVITAS – AI-Driven Disaster Communication Platform Github Flask, BLE, Chrome Nano AI	July' 25
- Designed an offline-first disaster communication system to support coordination during network outages and emergencies. - Executed BLE mesh networking for device-to-device messaging, built Flask APIs for coordination, and integrated AI-based alert summarisation and translation. - Delivered a working prototype enabling reliable multi-device communication and automated alert processing in simulated zero-network environments.	

Reddit Stock Trend Analyser Github NLP, APIs, Python	Apr' 25 – May' 25
- Built an end-to-end sentiment analysis system to examine how Reddit discussions influence short- term stock behaviour. - Implemented Reddit API ingestion, designed full text-cleaning pipelines (tokenisation, stop word filtering, lemmatisation), and converted raw posts into numerical sentiment features using NLP models and vectorisation techniques. - Generated structured datasets and sentiment-trend dashboards covering multiple stocks, yielding observable sentiment-price correlation patterns across weekly windows and enabling back-testing experiments with consistent signal output.	

TRAINING

GenAI Job Simulation Forage	Mar' 25
- Completed GenAI Job Simulation by Forage, building an AI-powered financial chatbot and performing data extraction & analysis. - Applied Generative AI concepts to solve real-world financial use cases through structured data processing and chatbot implementation (Forage GenAI Simulation, March 2025).	

CERTIFICATES

Python (basics) HackerRank	Dec' 23
SQL (basics) HackerRank	Mar' 24
Computational Theory: Language Principle & Finite Automata Theory SkillSoft	July' 24

ACHIEVEMENT

- Developed full-system ML architecture integrating computer vision, hardware modules, and analytics; manuscript currently under peer review. - Finalist – Google Chrome Built-in AI Hackathon (Gemini Nano APIs), building a production-ready AI-powered web application.

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 23 – Present
Computer Science and Engineering; CGPA: 7.56	
Don Bosco School	Gorakhpur, UP
Intermediate	Mar' 20 – May' 21
PCM; Percentage: 86%	
St. Joseph's School	Gorakhpur, UP
Matriculation	Mar' 18 – May' 19
Percentage: 88.5%
